A

Acetylcholine, storage and release 174
Acetylcholine receptor, muscarinic (mAChR) –
homology with β-AR and rhodopsin 99
stimulation in exocrine glands 373
Acetylcholine receptor, nicotinic (nAChR) –
homology with $GABA_A$ and glycine receptors 502
insect: a homo-oligomer? 107(L)
structure 318
structure and modulation 245
phosphorylation and desensitization 61
Acetylcholinesterase (AChE), structural polymorphisms 93
Actin, and axon outgrowth 431
Adenylate cyclase, signal transduction 53
β-Adrenergic receptor (β-AR), homology with mAChR and rhodopsin 99
Afferent fibres –
bifurcation of 205
primary 117
Alcohol, antagonist RO 15-4513 223
Algorithms for topographic maps 304
Allosteric transitions of nAChR 245
Alz-50 181
Alzheimer, A., life and work 306
Alzheimer's disease –
etiology 181
family studies 194
glutamate dysfunction 65, 406(L)
Amino acid transmitters, localization 250
γ-Aminobutyric acid, see GABA
Amphibians, limb regeneration 364
Amyloid, in Alzheimer's disease 181
Amytrophic lateral sclerosis (ALS) 393
Analgesia, in infants 344
Androgens –
and structural plasticity of CNS 341
sexual differentiation 197(L), 517
Aneurogenic limb, regeneration 364
Aneurysm, intracranial, and cerebral vasospasm 89
Anxiety, animal models 461
Anxiolytics 461
Arginine vasopressin, circadian rhythm 76
Arousal, histamine 86
Aspartate, pathways in CNS 273
Associative memory, and hippocampal LTP 408
ATP, modulation of ion channels 335
Attention, selective 13
Audition, electrical tuning of hair cells 421
Autonomic nervous system, GABA 255
Autoradiography –
receptor mismatch problem 22(L)
receptor localization 308, 497(L)
Axon, bifurcation of 205
Axon outgrowth 431
growth cone–neurite interactions 390
role of Schwann cell 137
Axonal regeneration, GAP-43 527

B

B-50 527
Bacteria, stretch-activated ion channels 387
Barrel field, establishment of 443
Bees, foraging maps 139
Behavior –
and neuropeptides in *Aplysia* 46
lamprey locomotion 34
sexual dimorphism of 197(L), 517
Benzodiazepine receptor, and RO 15-4513 223
Benzodiazepines –
as anxiolytics 461
endogenous ligand? 185
Bilateral cognitive functioning, and mathematical reasoning ability 17
Binocular vision, in arthropods 1
Birds, sexual differentiation 517
Blood–brain barrier, immune response to neural antigens 211
Bradykinin 226
Brain damage, and object recognition 145
Brain research, future directions 196(L)
Breathing, neuromodulation of 368

C

Calcium –
Ca^{2+}-activated K^+ channels 463
dietary deprivation and ALS 393
in LTP 142
muscarinic stimulation of exocrine glands 373
neuronal homeostasis 164, 460(L)
physiology of NMDA receptors 280
Calcium channels, regulation by G proteins 241
Cell adhesion molecules –
and axon outgrowth 431
neurite–growth cone interactions 390
Cell lineage –
lateral line system 74(L)
muscle fibre types 219, 325
study by retroviruses 303
Cerebral blood flow, abnormalities in migraine 8
Cerebral cortex, subdivisions 449
Cerebral vasospasm 89
Cerebrospinal fluid (CSF), circadian rhythm of arginine vasopressin 76
Chloride channels –
and cystic fibrosis 190
glycine receptor 113
Choline uptake system 174
Choriomeningitis virus, in CNS 455
Circadian rhythms, arginine vasopressin 76
Circuits, sensorimotor loops in spinal cord 108
Cloning, expression system 101
Cochlea, electrical tuning of hair cells 421
Cognitive function –
bilateralization and mathematical ability 17
object recognition 145
selective attention 13
Cohen, S., 1986 Nobel Prize 231
Commercial peptides, problems 22(L)
Computational models, and topographical maps 304
Conditioning, learning and memory in *Drosophila* 330
Conformational changes of nAChR 245
Copulatory system in rodents, neuronal plasticity 341
Coronaviruses, in CNS 455
Cortex –
subdivisions 449
visual 487
Cortical spreading depression, as migraine mechanism 8
Coturnix japonica, sexual differentiation of 517
Critical period, of sexual differentiation 517
Cutaneous primary afferent fibres, ultrastructure 117
Cycad ingestion, and ALS 393
Cystic fibrosis 190
Cytoplasm –
calcium homeostasis 164
electron microscopy 321
Cytoskeleton –
alteration in Alzheimer's disease 181
assembly of 186
electron microscopy 321
role in exocytosis 446

D

DARPP-32 377
Dean, R.B., discovery of sodium pump 451
Degeneration, cell loss in Huntington's disease 24
Dendrites, morphology 398
Depth vision, in arthropods 1
Dermatome, development of skin sensory innervation 468
Desensitization, nAChR phosphorylation 61
Development –
and regeneration in amphibians 364
axon outgrowth 137, 431
cell lineage study using retroviruses 303
establishment of barrel field 443
GAP-43 527
homeobox 3
lateral line system 74(L)

muscle fibre types 219, 325
respiration 368
skin sensory innervation patterns 468
Diabetes mellitus, and polyneuropathy 6
Diabetic neuropathy, vascular basis 6
Diacylglycerol, activation of protein kinase C 30
Digital image processing, neuronal morphology *in vivo* 398
Dopamine –
and protein phosphorylation 377
in the retina 200
nigrostiatal neural implants 509
Dorsal root ganglia (DRG), development of skin sensory innervation 468
Down's syndrome, and Alzheimer's disease 181, 194
Drosophila –
associative learning in 330
homeotic genes 3

E

E. coli, stretch-activated ion channels 387
Ear, electrical tuning of hair cells 421
Egg-laying hormone in *Aplysia* 46
Electron microscopy, cytoplasm 321
Electrosensory system, hormone sensitivity of 416
Enteric nervous system, GABA 255
Environmental etiology in ALS 393
Enzymes, acetylcholinesterase 93
Epidermal growth factor, 1986 Nobel Prize 231
Epilepsy –
and LTP 288
and myoclonus 69
excitatory amino acid excitotoxicity 299
Graham Goddard 354
Estrogens, sexual differentiation 517
Ethanol, antagonist RO 15-4513 223
Excitatory amino acid pathways, anatomical distribution 273
Excitatory amino acid receptors –
agonists and antagonists 265
anatomical distribution 273
and LTP 288
excitotoxicity 299
nomenclature 74(L)
non-competitive antagonists 294
physiology 280, 284
Excitatory amino acids 263
and LTP 142
excitotoxicity 59
lamprey locomotion 34
Excitotoxicity –
and Alzheimer's disease 64
excitatory amino acids 59
NMDA receptor 299
Exocrine glands, muscarinic stimulation 373
Exocytosis –
ACh 174
mechanisms 446
Expression cloning 101
Eye movement, and visual stabilization 153

F

F1 527
Face recognition 358
Feature extraction in visual processing 358
Filopodia, growth cone mechanisms 431
Fish, weakly electric 416
Flies (*Drosophila*) –
associative learning 330
homeotic genes 3
Frequency selectivity, hair cells in cochlea 421
Freud, S., and Alois Alzheimer 306
Frontal cortex, subdivisions 449
Funding (government), history of in USA 235
Funding (private sector) –
directory 235
history of in USA 235
Fusion pore in exocytosis 446

G

G proteins –
action of bradykinin 226
homology of related receptors 99
receptor inactivation 355(L)
regulation of ion channels 241
signal transduction 53
GABA
and benzodiazepines 185
in enteric nervous system 255
localization 250
$GABA_A$ receptor, molecular structure 502
Galanin 158
Gap junctions –
and muscarinic stimulation 373
effects of dopamine on 200
GAP-43 527
GAP-48 527
Gating, voltage-dependent 522
Gender differences in mathematical ability 17
Gene expression, trans-synaptic regulation of 473
Gene therapy –
in *hypogonadal* mice 229
in *shiverer* mice 388
Genetics, of associative learning in *Drosophila* 330
Glia –
changes in Huntington's disease 404(L)
morphological change in response to oxytocin 426
establishment of barrel field 443
Schwann cells and axon guidance 137
Glucocorticoids, stress response and hippocampal damage 346
Glutamate –
dysfunction in Alzheimer's disease 65
excitotoxicity 59, 299
interaction with dopamine effects 377
localization 250, 273
neurotransmission 263
pathways in CNS 273
Glycine, and NMDA response 280, 284
Glycine receptor –
homology with $GABA_A$ receptor 502
structure and function 113
Gnostic units, in visual processing 358
Goddard, G., tribute to 354
Gonadotropin-releasing hormones (GnRH) –
gene therapy 299
peptide family 129
Government funding, status of UK 105
Grafts, neural implants 509
Growth cones –
and Schwann cells 137
interactions with neurites 390
movement 431
Growth factors, 1986 Nobel Prize 231
Growth-associated peptides (GAPs) 527
GTP, and muscarinic stimulation 373
Gut, GABA as autonomic transmitter 255

H

Hair cells, electrical tuning 421
Hamburger, V., contribution to work on growth factors 231
Hebb's postulate, and LTP 408
Hippocampus –
and glucocorticoids 346
and LTP 142, 288, 408
Histamine (HA) 86
Homeobox, and pattern formation 3
Hormones –
and sexual differentiation 197(L)
and structural plasticity of CNS 341
and plasticity of electrosensory system in fish 416
arginine vasopressin 76
glucocorticoids 346
GnRH gene therapy 229
gonadotropin-releasing hormones 129
oxytocin and structural plasticity 426
oxytocin and vasopressin 498
sexual differentiation 517
Human immunodeficiency virus (HIV) –
and motor neuron diseases 393
in CNS 455
Huntington's disease, neuropathology 24, 404(L)
Hyperexcitability, and myoclonus 69
Hypogonadal (hpg) mouse, gene therapy 229
Hypothalamus –
histamine-containing neurons 86
magnocellular neurosecretory cells 498
structural plasticity and oxytocin 426
vasopressin rhythm 76

I

Imaging neurons *in vivo* 398
Immune system, and neural antigens 211
Immunocytochemistry –
amino acid transmitter localization 250, 273
receptor localization 308
Infant pain 344
Information processing –
and axonal bifurcation 205
in retina 478
object recognition 145
Inositol phosphates –
and muscarinic stimulation 373
effects of bradykinin 226
Inouye, T., mapping of visual fields 350
Insects, foraging maps 139

In-situ hybridization, receptor localization 308
Intracerebral implants 509
Ion channels –
Ca^{2+}-activated K^+ 463
Cl^- 113, 502
cystic fibrosis 190
in exocrine glands 373
modulation by ATP 335
nAChR 245, 318
regulation by protein kinase C 30
regulation by G proteins 53, 241
sodium 221, 522
stretch-activated 387
Ion homeostasis, and cortical spreading depression 8
Ischemia, and diabetic neuropathy 6

J

Japanese quail, sexual differentiation of 517
Joint movements –
and motor coordination 170
in limb dynamics 123

K

Kainate, excitotoxicity 59, 299
Kainate receptors 263, 265
anatomical distribution 273
excitotoxicity 299
physiology of 280
Ketamine, non-competitive NMDA receptor antagonist 294
Kindling, Graham Goddard 354
Kraepelin, E., and Alois Alzheimer 306

L

Lamellipodia, growth cone mechanisms 431
Lamprey, locomotion 34
Lateral line system, 74(L)
Lathyrism, and ALS 393
Learning –
in *Drosophila* 330
olfactory 434
Left-handedness, and mathematical reasoning ability 17
Levi-Montalcini, R., 1986 Nobel Prize 231
Limb dynamics 123, 170
Limb regeneration, amphibians 364
Locomotion –
lamprey 34
limb dynamics 123
Locus coeruleus, function 343
Long-term enhancement (LTE), see long-term potentiation
Long-term potentiation (LTP) –
and memory storage 408
and NMDA receptors 288
calcium trigger 142

M

Magnocellular neurosecretory cells 498
Major histocompatibility complex (MHC), and neural antigens 211
Maps –
and computational models 304
foraging in insects 139
retinotopic 310
superior colliculus 312
Mathematical ability, biological correlates 17
Mechanical tension, and axon outgrowth 431
Memory –
and hippocampal LTP 408
in *Drosophila* 330
Microscopy, cytoplasm 321
Microtubule-associated proteins (MAPs), and cytoskeleton assembly 186
Microtubules, assembly of cytoskeleton 186
Migraine, and cortical spreading depression 8
MK-801 294
Morphology, and synaptic efficacy 42
Motoneurons, and development of muscle fibre types 219, 325
Motor commands, voluntary movement 81
Motor control –
coordination of movement 170
generation of voluntary commands 81
hyperexcitability and myoclonus 69
limb dynamics 123
spinal circuitry 108
Motor neuron diseases 393
Motor unit, development of 325
Movement –
coordination of 170
sensory guidance of 312
Mumps virus, in CNS 455
Muscarinic acetylcholine receptors, see Acetylcholine receptor, muscarinic
Muscle –
limb dynamics 123
origin of fibre types 219, 325
voluntary control of 81
Mutations, afffecting learning in *Drosophila* 330
Myelin basic protein (MBP), rescue of *shiverer* phenotype 388
Myenteric ganglia, GABA 255
Myoclonus, classification of 69
Myopia, and mathematical reasoning ability 17
Myosin, isoforms 219

N

NADPH-diaphorase neurons, spared in Huntington's disease 24
Neocortex, subdivisions 446
Neonatal pain 344
Nerve Growth Factor (NGF), 1986 Nobel Prize 231
Networks, activity dependence 188
Neurites, interactions with growth cones 390
Neuritic plaques, in Alzheimer's disease 181
Neurofibrillary tangles, in Alzheimer's disease 181
Neurofilaments, assembly of cytoskeleton 186
Neuromodulators, and respiration 368
Neuropathology, Huntington's disease 24, 404(L)
Neuropathy, diabetus mellitus 6
Neuropeptides, see Peptides
Neuroscience, future directions 196(L)
Neurotoxicity –
and NMDA receptor 299
glutamate and Alzheimer's disease 406(L)
Neurotransmitters, mismatch problem in autoradiography 22(L)
Nicotinic acetylcholine receptor, see Acetylcholine receptor nicotinic
Nigrostriatal system, neural implants 509
NMDA receptors 263
agonists and antagonists 265
anatomical distribution 273
and Alzheimer's disease 65
and LTP 142, 288, 408
and PCP/sigma opioid receptor sites 444
excitotoxcity 59, 299
glutamate neurotoxicity and Alzheimer's disease 406(L)
lamprey locomotion 34
non-competitive antagonists 294
physiology of 280, 284
Nobel Prize, 1986 231
Nociception –
bradykinin 226
infant pain 344
Nomenclature, excitatory amino acid receptors 74(L)
Nucleotides, modulation of ion channels 335

O

Object recognition, category-specific deficits 145
Ocular dominance columns, activity dependence 188
Ocular following, and visual stabilization of eyes 153
Olfaction, structural plasticity and learning 434
Orientation selectivity in visual cortex 487
Oxytocin –
and structural plasticity 426
magnocellular neurosecretory cells 498

P

Pain, in infants 344
Paired helical filaments, in neurofibrillary tangles 181
Parallel distributed processing (PDP), face recognition 358
Paraproteinemia 393
Pattern formation, and the homeobox 3
Peanut agglutinin, establishment of barrel field 443
Peptides –
arginine vasopressin 76
commercial 22(L)
expression cloning of 101
galanin 158
gonadotropin-releasing hormones 129
in *Aplysia* 46
Perception –
object recognition 145
selective attention 13
voluntary motor commands 81
Peripheral nervous system, imaging neurons *in vivo* 398
Phencyclidine (PCP) –
non-competitive NMDA receptor antagonist 294

receptor sites 444
Phorbol esters, activation of protein kinase C 30, 57
Phosphoinositides –
and GAP-43 527
and protein kinase C 57
effects of bradykinin 226
Phosphorylation –
and nAChR desensitization 61
dopaminergic regulation of 377
GAP-43 527
Photoreceptors –
effects of dopamine on 200
information processing in 478
Plaques, in Alzheimer's disease 181
Plasticity –
activity dependence of synaptic specificity 188
and protein kinase C 57
androgens 341
electrosensory system in fish 416
GAP-43 527
imaging *in-vivo* synaptic connections 398
olfactory circuits 434
oxytocin 426
Poephila guttata, sexual differentiation of 517
Point images, and retinotopic mapping 310
Poliovirus, in CNS 455
Potassium channels –
Ca^{2+}-activated 463
modulation by ATP 335
regulation by G proteins 241
pp46 527
Praying mantis, binocular depth vision 1
Primary afferent fibres, ultrastructure 117
Protein kinase C, and transmitter actions 57
Protein kinase C, ion channel regulation 30

Q

Quinolinic acid, and neuronal loss in Huntington's disease 24
Quisqualate receptors 263, 265
excitotoxicity 299
physiology of 280

R

Rabies virus, in CNS 455
Receptive fields, and retinotopic mapping 310
Receptors –
autoradiography 497(L)
benzodiazepine 223
dopamine 200, 377
excitatory amino acid 263, 265, 273, 280, 284, 288, 294, 299
for viral neurotropism 455
$GABA_A$ 502
glycine 113
homology of mAChR, β-AR and rhodopsin 99
mismatch problem 22(L)
nAChR 61, 245, 318
PCP/sigma opioid 444
techniques for localization 308
Recombinant DNA –
expression cloning 101
gene therapy 229
Reflexes, spinal 108
Regeneration –
aneurogenic limb 364
GAP-43 527
role of Schwann cell 137
Remodelling of neuronal morphology over time 398
Remodelling of synaptic connections, oxytocin 426
Reoviruses, in CNS 455
Reproduction, gonadotropin-releasing hormones 129
Respiration, neuromodulators 368
Retina –
dopamine 200
information processing in 478
Retinal ganglion cells, axonal bifurcation 205
Retinotopic mapping 310
Retroviruses, study of cell lineage 303
Rhodopsin, homology with β-AR and mAChR 99
Rhythm, circadian 76
RO 15-4513 223

S

Schizophrenia, biological correlates 152(L)
Schwann cells, and axon guidance 137
Scrapie 149
Second messengers –
action of bradykinin 226
and protein phosphorylation 377
G proteins 241
protein kinase C 30, 57
Secretion –
and cystic fibrosis 190
fluid 373
Selective attention 13
Sensation, voluntary motor commands 81
Sensorimotor control of spinal circuitry 108
Sensory axons, development of skin innervation patterns 468
Sensory transduction, audition 421
Serotonin (5-HT), and anxiolytic effect of benzodiazepines 461
Sex differences in mathematical ability 17
Sexual differentiation –
birds 517
CNS 197(L)
Sexual dimorphism –
behavior 197(L), 519
electric discharge in weakly electric fish 416
Shiverer, rescue of phenotype 388
Sigma opioid receptor sites 444
Signal transduction, G proteins 53, 241, 355(L)
SKF 10 047, non-competitive NMDA receptor antagonist 294
Skin sensory innervation patterns 468
Sodium channels –
molecular structure 522
subtypes 221
Sodium pump, discovery of 451
Spinal cord –
motor control 108
ultrastructure of primary afferent fibres 117
Spine apparatus, calcium sequestration 460(L)
Steroids –
glucocorticoids 346
plasticity of electrosensory system in fish 416
sexual differentiation 197(L), 517
structural plasticity of CNS 341
Stress, glucocorticoids and hippocampal damage 346
Stretch-activated ion channels 387
Striatum –
cell loss in Huntington's disease 24, 404(L)
dopamine and protein phosphorylation 377
neural grafts into 509
Structural plasticity –
androgens 341
imaging neurons *in vivo* 398
oxytocin 426
Subarachnoid hemorrhage, and cerebral vasospasm 89
Substance P, and respiration 368
Superior colliculus, sensory and motor maps 312
Synapses, input–output relations 42
Synaptic boutons, of primary afferent fibres 117
Synaptic connectivity patterns, activity dependence 188
Synaptic efficacy 42
and conformational changes in nAChR 245
and LTP 408
Synaptic remodelling –
imaging *in vivo* 398
oxytocin 426
Synaptic vesicles –
ACh 174
exocytosis 446

T

Tau proteins, and Alzheimer's disease 181
Topographical maps –
and computational models 304
in superior colliculus 312
Transcription, trans-synaptic regulation of 473
Transgenic mice, *shiverer* and MBP 388
Transmitter action –
dopamine 200
gene expression 473
Transmitter release –
and synaptic efficacy 42
mechanisms of exocytosis 446
Transmitters –
amino acid 250
dysfunction in Alzheimer's disease 65
Transplantation of neural tissue 509
Travelling salesman problem 304
Tropical spastic parapareisis 393

U

UK, status in world science 105

V

Vasopressin –
circadian rhythm 76
magnocellular neurosecretory cells 498
Vasospasm 89
Vesicles –
exocytosis 446
ACh 174
Video imaging of neurons *in vivo* 398
Viral neurotropism 455, 492
Viruses –
and motor neuron

diseases 393
choriomeningitis 455
coronaviruses 455
HIV 455
mumps 455
poliovirus 455
rabies 455
reoviruses 455
scrapie 149
Vision –
binocular 1
information processing in retina 478
ocular following 153
Visual cortex –
mapping of visual fields 350
orientation selectivity 487
Visual processing, face recognition 358
Visual system, axonal bifurcation 205
Voltage gating, molecular basis 522
Voluntary movement, centrally generated commands 81
Voluntary organizations funding neuroscience, directory 235

W

Wasps, foraging maps 139
Weakly electric fish, electrosensory system 416

Z

Zebra finches, sexual differentiation of 517

Books Reviewed
